EXPERIENCE

Business Intelligence Developer Intern | Budget Wireless LLC, NY

Apr 2023 – Dec 2023

- Refactored and optimized complex SQL Server queries, achieving a 90% reduction in report generation time and ensuring analytics workflows run reliably under heavy load.
- Produced detailed business reports by combining SQL scripts with advanced Excel (VLOOKUP, PivotTables), translating raw data into executive-level dashboards and strategic insights.
- Designed interactive Highcharts dashboards to visualize P&L, sales, and inventory trends—empowering leadership with on-demand trend analysis and anomaly detection.
- Built and enhanced full-stack portals (HTML, CSS, C#, .NET, SQL Server) by developing a ticketing system and reworking upload/report automation—streamlining issue tracking, reducing resolution times, and boosting throughput and data accuracy.
- Collaborated on SAP data reconciliation, working closely with accounting and finance teams to reconcile complex financial data sets and enforce compliance through automated validation scripts.

Trainee – Associate Software Engineer | IDEaS Revenue Solutions, India

Jan 2022 – Aug 2022

- Improved UI responsiveness and data presentation by enhancing features with Java, Spring Boot, and VAADIN.
- Replaced legacy system with an **Embedded Redis cache**, reducing data retrieval time significantly.
- Resolved 15+ automation test failures in collaboration with QA by addressing core issues.
- Delivered 20+ user stories with 100% on-time completion, supporting overall system reliability.

Flutter Developer Intern | CTO-Ninja, India

Mar 2022 – May 2022

- **Heyoo** (built from scratch): Developed the entire Flutter frontend, creating responsive UIs and integrating Google Places for location search and Stream Chat for real-time messaging, driving a 25% increase in user engagement.
- **Maangal** Matrimony (UI upgrade): Revamped the existing Flutter app's interface with new chat features and RESTful API integrations, resolving 20+ critical bugs to improve stability and user satisfaction.

Full Stack Developer Intern | ISKCON, India

Jan 2021 – Dec 2021

- Spearheaded full-stack development of an event management app using Flutter and Spring Boot REST APIs, translating UI/UX designs into seamless mobile experiences.
- Integrated Firebase Authentication for secure user sign-up/login and Firebase Storage for dynamic content handling. Utilized BLoC (Business Logic Component) for state management to build scalable, maintainable app logic with clean separation of UI and business layers.
- Integrated Google Maps & Places APIs for geo-based event discovery and turn-by-turn navigation.
- Designed MySQL schemas and queries with indexing strategies, cutting event data retrieval times by 60%.
- Migrated codebase from Flutter v1 to v2—refactoring widgets, updating dependencies, and removing deprecated APIs for long-term maintainability.
- Conducted QA testing & Play Store deployment, coordinating bug triage & compliance checks for a seamless launch.

EDUCATION

Master of Science (MS) in Information Systems | Pace University | New York. | GPA: 3.74/4

May 2024

Bachelor of Technology (B. Tech) in Information Technology | VIIT, Pune | CGPA: 9.21/10

May 2022

SKILLS

- **Database Management Systems:** MS SQL, MySQL, PostgreSQL, Firebase
- **Programming Languages:** Python, Java, SQL, R, HTML, CSS, Dart (Flutter), PHP
- **Data Visualization Tools:** Power BI, Tableau, Excel
- **Frameworks & Libraries:** Flutter, Spring Boot, Django, Flask, Pandas, Scikit-Learn, Numpy, Matplotlib
- **DevOps & CI/CD:** Jenkins, GitHub, Git
